industry

Complete food and beverage and stock management application for the hospitality industry

## PlusPoint POS and Stock Control - Features

---

PlusPoint Point of Sale and Stock system is a Windows Restaurant and Bar management system. It is a PC based system that can run off a single or multiple workstations, turning your operation into an efficient POS and Stock control establishment.

With the unique use of 'picture buttons' and an 'all on one screen' design, the system is extremely user friendly and configuration is simple and easily transferable between stores and outlets.

The flexibility of the system allows for the use of either a keyboard, mouse or touch screen for user input. PlusPoint POS along with PlusPoint Stock Control offers a professional Food and Beverage Solution.

Central Purchasing and Stock Control has been added to the functionality of this product making it a more manageable hospitality package.

### Features and Functions

- PlusPoint POS and Stock offers interfacing to most Front of House systems, specifically aimed at the Hotel, Lodge and Resort establishments
- This Restaurant and Bar management system offers comprehensive on-line assistance as well as 'fly-over' tips (Also 24 hours telephonic support)
- Multiple operator modes cater for 'Fast-Bar' or Register functions
- The detailed transaction reporting, coupled with Bill and Cash-up history creates a powerful auditing tool
- Products, with its related preparation instructions, can be printed across multiple requisition printers
- Caters for all your daily functions and operational nuances; split-invoicing, user logins (for operator history), swipe cards (if necessary), supervisor access for manual over-rides (restricted to management) etc.

Picture Buttons →

Touch screen, keyboard or swipe card functionality with unlimited menu options, picture buttons and easy configuration

→ Picture Buttons for Stock Items  
 → Limitless Pop-Up menu's  
 → Touch Screen friendly  
 → Ease of Use

→ Booking Facilities  
 → Table Planning  
 → Endless Reporting

→ Easy Configuration  
 → Non-stock Sales Items

PlusPoint POS is restricted to login's or swipe cards. Only specified users are given access to certain outlets, and administrators can manage user rights from PlusCentral. This restricts attendant's with respect to reporting rights and all aspects of the Point of Sale operation according to your business practice.

Now with barcode scanning for stock take purposes, makes stock control a breeze. Complete stock management system made easy within PlusCentral, reporting on variances, store levels etc.

Efficient Point of Sale operations governed by administrative access and easy management using PlusCentral Stock module

PlusPoint Stock Control (PlusCentral) is a powerful stock control system that can be accessed by a single or multiple workstations, like PlusPoint POS. PlusPoint's use of Windows Menu Options, makes this system user-friendly and simple to navigate for the end user.

PlusPoint Stock Control manages inventory in any number of stores and outlets. Configuration is simple and only one stock item file needs to be created, as we have the ability to populate any outlet/store in the Stock system, and store levels are built accordingly. Requisitions, Orders, Deliveries, Issues and Reductions are automated.

Central Purchasing and Stock Control has been built into the module to allow for centralized management of your inventory and to service all orders and deliveries from this facility making management a one-stop shop - ideal for groups in the industry.

- Windows friendly 'look and feel'
- Drop down menu's for easy configuration
- Employee Codes and Access Restriction
- Employees have certain rights, easily manageable from the PlusPoint Stock module

### Reporting

PlusPoint has the ability to generate a multitude of reports, from movement reports to issues, requisitions, orders and deliveries reporting.

Those are stock reports however the POS reports gives a report on employee activity, transaction audits and outlet analysis. There are other general reporting where necessary, from member reports to general system log reports.

Your complete food and beverage solution

For efficient stock control, make a profitable addition to your operation!

**PlusPoint POS and Stock Control** is an A-Grade locally developed product. Hospitality Technology International (Pty) Ltd offers 24-hour support. The product is developed on a stable and friendly MS SQL platform and uses a robust SQL Database ensuring reliability and minimal down-time.

HTI has been developing world class software, specifically for the hospitality industry for over 17 years. We have experienced enormous success with WinTill and guarantee further success with PlusPoint. We had over 40 WinTill customers, but over 20 of those have already made the migration to PlusPoint with ease. We have over 50 customers throughout the world at the Property Management level and over 50 Hotel and Lodge Groups at the Central Reservations level.

We have a footprint throughout Africa, as well as industry partners in Europe and the USA. Our thriving customer base is testament to our development in the industry and we continue to extend our presence throughout Africa and the rest of the world with quality assurance at the forefront of our minds.

We would be happy to present the product to you. We have branches in Cape Town, Port Elizabeth, Durban and Nairobi, Kenya so please arrange for your nearest branch to visit Your Head Office or Property and demonstrate the Complete Property Management System.
